VIDEO SURVEILLANCE

ANALOG HD CAMERA

An HD analog camera is a special type of analog CCTV camera that can now record surveillance video in 4K. As an affordable alternative to IP technology, HD analog cameras grant you access to the newest technology in the surveillance world while staying on budget, an important factor for small businesses. While previously only a feature available on newer IP cameras, these HD analog cameras are ideal for surveillance systems that need HD quality for video evidence but may not need more the more advanced features of IP video. To incorporate new HD analog cameras into an existing CCTV system, you will need to use an HD DVR capable of handling the HD video files.

IP CAMERA SYSTEM

IP surveillance is increasingly replacing analog CCTV because it offers much more sophisticated capabilities like Improved search capability, greater ease of use, better quality images with no degradation of content over time, ability to record and play simultaneously and ability to compress content for improved storage. We offer a complete range of network cameras, from robust outdoor cameras to discreet products for sensitive environments, including fixed cameras and domes, PTZ, thermal and panoramic cameras.

BIOMETRIC SOLUTIONS

This technology is easy to use, individualized, and convenient. Let us guide you to evolve from access control cards and keypads to an innovated biometrics access control solution that increases the security of your business. This can recognize a person based on biological traits, such as a fingerprint. It allows you to identify who is gaining access to specific areas in your facility. Biometrics is also more difficult to fraudulently surpass, allowing maximum security. By installing fingerprint, iris and facial identification systems, we can help you create a highly personalized security system to maximize the safety of your organization with the most advanced, secure and personalized solutions in access control.

One pertinent feature of Biometric Authentication system is the ease to integrate with other technologies and to automate. Apart from access-control systems, Biometric Authentication can be integrated with Attendance Software, helping you track the working hours of employees helping you improve payroll efficiency.

TIME ATTENDANCE SYSTEM

SYNCBYTE provides Time Attendance Terminals solutions for small, medium and large organization to meet their attendance needs. Time attendance terminals increase productivity by reducing employee lateness, unauthorized long breaks and early departures. It not only saves administrative cost but also facilitates HR to centrally manage the attendance policies from multiple locations. Automatic calculation of overtime, leave balance, enables managers to work efficiently. Its standalone or network based operation is ideal for Schools, Hospitals, Government Institutes, Banks, Remote Sites, Hotels, Small/Large Enterprises and many more. HR can easily utilize employee attendance management software for employee review, appraisals or monthly salary calculation. Our trained technicians offer best installation and can configure the Time Attendance Machines such as Fingerprint, card-based systems or Hand Punch systems.

Gone are the days when your employee could join work at 11 and fraudulently mark his attendance at 10. So are the days when passwords to lockers were stolen and unauthorized persons accessed your secret vaults. Biometric systems provide highly accurate and nearly impenetrable solutions for authentication.

ACCESS CONTROL AND GATE BARRIER SYSTEM

SYNCBYTE understands how important secured control of offices, facilities and assets are to our customers and to their employees. In business environment, the ability to appropriately control and monitor physical access to the facilities is critical to effective management and security. Our access control offers robust and scalable technology that meets our needs whether it you own a small business or an enterprise level business with multiple locations.

We provide highly reliable and functional gate barrier systems for your security purposes. Automatic gates and barriers can ensure that only authorized visitors are entering the premises. Apart from an ideal solution for controlling vehicle transit, Gate Barriers also play a defining role in marking your territory and its clear boundary.

Gates and barriers play an important part in allowing access to your business area. Our range of gate barriers serves the purpose of allowing individual passage of vehicles and regulating the entry and exit of vehicles. SyncByte has a wide range of products in the entry control system category.

ID CARDS & PRINTERS

PVC card known for its durability, flexibility and versatility. A PVC ID card can be secured by the ID card security technology that you want it to have. This includes solutions like magnetic stripes and newer, more high-tech security features like smart chips.

VISUAL SECURITY

To get the most out of your PVC card security, we always recommend that your cards include holographic visual identification technology. This makes it incredibly difficult to copy a PVC card or alter it in any way without someone easily noticing a discrepancy.

DIGITAL SECURITY

The digital security features that a PVC card determines how people are able to access certain terminals, entryways, etc. within your organization. Your best options in this regard are magnetic stripes, smart chips and RFID proximity communication capabilities. For example, proximity PVC cards are efficient, secure and they can allow people access without even taking the card out of their bags.

ID CARD PRINTERS

A successful ID card program requires a professional ID card printer. ID card printers offer a variety of functionalities geared specifically towards printing and issuing high-quality PVC ID cards and badges.

STRUCTURED CABLING

Cabling is a standard way of managing and utilizing your enterprise building's connectivity to facilitate moves, adds and changes on your network without causing unnecessary downtime or interruptions. It's also a smart, easy-to-manage network infrastructure that supports applications such as Internet, TV, Telephone and much more.

SYNCBYTE recognizes that the backbone of any physical technology infrastructure includes the components that comprise the network topology. Whether wireless or wired, network components eventually require a physical CAT or FIBER infrastructure backbone for connectivity. We help you design and install a communications framework that provides maximum efficiency and flexibility.

SMATV & IPTV

IPTV provides an integrated platform for simultaneously delivering multiple TV channels over IP protocol to the desktop and television environment. IPTV (Internet Protocol Television) is becoming more popular in modern Hotels and commercial properties. A single head-end can deliver multiple TV channels and be combined with multiple receiver types to meet a customer's exact channel line-up. The VoD platform allows different content formats and their associated data to be managed through a single, integrated interface.

SMATV is system for signals received via satellite, terrestrial networks or radio. Multiple satellite signals are connected to Multi switch. These switches distribute signal to end user. End user can use appropriate satellite receiver / decoder to receive the channels. SMATV networks are used in Residential building, Hotel apartments, some small housing estates hotels, hospitals, corporate sectors.

WEB DESIGNING & SOFTWARE SOLUTIONS

WED DESIGNING

Google is the new compass, and we make sure that it points at you! No matter what your business venture is, making your presence felt in the web is an indispensable part of it. Customers search on the internet before making product/service choices, and if you are not there, you are in the losing end. Our team of professionals craft websites that are eye-candy, and we make sure that they top the search-results.

SOFTWARE SOLUTIONS

Our developers craft customised softwares that meet all your needs in Enterprise resource planning (ERP), Supply chain management (SCM), or Customer relationship management (CRM). We also develop point of sale systems, making us a one-stop destination for all that your business needs in terms of security and technology.

IT INFRASTRUCTURE SOLUTIONS

WIFI ACCESS POINTS & FIREWALLS

Wi-Fi technology has improved greatly in recent years, but it's not one-size-fits-all, especially when it comes to businesses. Large office spaces with heavy traffic typically utilize Wi-Fi access points.

Firewall is a network security system designed to prevent unauthorized access to or from a private network. In addition to monitoring internet traffic, the latest network firewall security products incorporate a wide range of additional features. We are partnered with Major Firewall brands like Fortinet, SonicWall, Cisco etc.

SWITCHES

Network switch centralizes communications among multiple connected devices in one local area network (LAN). We deliver the connectivity required for seamless and strong communication between your networked devices. Whether your business requires a single additional network point, or a new network installation, our team will be able to provide a quick and professional solution to your needs. Our range of network switches solutions from leading manufacturers including Aruba, Cisco, Linksys, Dlink and Netgear.

SERVERS

Whether you require your first server, or already have a multi-server and multisite infrastructure and need consultancy, upgrade or replacement our team our here to help. Contact us today to discuss the server requirements of your business. We are proud to supply HP/Dell Server hardware at competitive prices and to specifications that are tailored to your business.

IT MANAGEMENT SERVICES

BACK UP SOLUTION

A secure and stable data backup system is an absolute must to ensure that businesses are quickly able to resume work as usual if their data suffers some form of loss. We offer a variety of backup systems depending on requirements, to give you peace of mind in the knowledge that your information is safe.

HARDWARE & SOFTWARE

We can provide a varied range of hardware and software solutions at the most competitive prices on the market, thanks to our strong relationships with leading distributors within the industry. With common items such as standard spec PCs in stock, we're always on hand to provide the IT solutions you need

MANAGED IT SERVICE (IT AMC)

Our team solve IT issues quickly and efficiently to ensure your business can run smoothly, without technology delaying your team's productivity. Whether your business relies on a single PC, or a network containing several sites, servers and/or cloud services - We have years of collective expertise providing a competitive service to our customers.
