VIDEO SURVEILLANCE

We SYNCBYTE do security camera installation as per SIRA regulations. We are geared to undertake projects from Government establishments, Corporate Organizations, Offices, Buildings, Villas, Hotels, Hotel Apartments, Labour Camps, Money Exchange Etc.

ANALOG HD CAMERA

An HD analog camera is a special type of analog CCTV camera that can now record surveillance video in 4K. As an affordable alternative to IP technology, HD analog cameras grant you access to the newest technology in the surveillance world while staying on budget, an important factor for small businesses. While previously only a feature available on newer IP cameras, these HD analog cameras are ideal for surveillance systems that need HD quality for video evidence but may not need more the more advanced features of IP video. To incorporate new HD analog cameras into an existing CCTV system, you will need to use an HD DVR capable of handling the HD video files.

EXTRA EYES TO SEE MUCH MORE...

IP CAMERA SYSTEM

IP surveillance is increasingly replacing analog CCTV because it offers much more sophisticated capabilities like Improved search capability, greater ease of use, better quality images with no degradation of content over time, ability to record and play simultaneously and ability to compress content for improved storage. We offer a complete range of network cameras, from robust outdoor cameras to discreet products for sensitive environments, including fixed cameras and domes, PTZ, thermal and panoramic cameras.

A PVC card is a plastic card composed of a graphic-quality version of a known as polyvinyl chloride (PVC). It is known for its durability, flexibility and versatility. PVC cards are generally considered the best solution for producing ID cards.

A PVC ID card can be secured by the ID card security technology that you want it to have. This includes solutions like magnetic stripes and newer, more high-tech security features like smart chips.

VISUAL SECURITY

To get the most out of your PVC card security, we always recommend that your cards include holographic visual identification technology. This makes it incredibly difficult to copy a PVC card or alter it in any way without someone easily noticing a discrepancy.

DIGITAL SECURITY

The digital security features that a PVC card determines how people are able to access certain terminals, entryways, etc. within your organization. Your best options in this regard are magnetic stripes, smart chips and RFID proximity communication capabilities. For example, proximity PVC cards are efficient, secure and they can allow people access without even taking the card out of their bags.

AN ID CARD IS NOT ONLY IDENTITY BUT ALSO AUTHENTICITY

ID CARD PRINTERS

A successful ID card program requires a professional ID card printer. ID card printers offer a vaiety of functionalities geared specifically towards printing and issuing high-quality PVC ID cards and badges.

SYNCBYTE provides IT Infrastructure Solution comprises of Firewalls, Routers, Wired and Wireless network, Servers, storage solutions, backup and disaster recovery solutions and IT Security. As a major IT company in UAE, we have got a wide range of IT services to offer our clients based upon their demands.

FIREWALLS

Firewall is a network security system designed to prevent unauthorized access to or from a private network. Firewall protection has come a long way in recent years. In addition to monitoring internet traffic, the latest network firewall security products incorporate a wide range of additional features. We are partnered with Major Firewall brands like Fortinet, SonicWall, Cisco etc. Our Engineers are expertise with all major brands with great hands on experience.

WIFI & SWITCHES

Wi-Fi technology has improved greatly in recent years, but it's not one-size-fits-all, especially when it comes to businesses. Large office spaces with heavy traffic typically utilize Wi-Fi access points. Network switch centralizes communications among multiple connected devices in one local area network (LAN). We deliver the connectivity required for seamless and strong communication between your networked devices.

CENTRALISED DATA MANAGEMENT

SERVERS

Whether you require your first server, or already have a multi-server and multisite infrastructure and need consultancy, upgrade or replacement our team our here to help. Contact us today to discuss the server requirements of your business. We are proud to supply HP/Dell Server hardware at competitive prices and to specifications that are tailored to your business.

aruba SONICWALL® CISCO

BACK UP SOLUTION

A secure and stable data backup system is an absolute must to ensure that businesses are quickly able to resume work as usual if their data suffers some form of loss. We offer a variety of backup systems depending on requirements, to give you peace of mind in the knowledge that your information is safe

HARDWARE & SOFTWARE

We can provide a varied range of hardware and software solutions at the most competitive prices on the market, thanks to our strong relationships with leading distributors within the industry. With common items such as standard spec PCs in stock, we're always on hand to provide the IT solutions you need

ANNUAL MAINTENANCE CONTRACTS

MANAGED IT SERVICE (IT AMC)

Our team solve IT issues quickly and efficiently to ensure your business can run smoothly, without technology delaying your team's productivity. Whether your business relies on a single PC, or a network containing several sites, servers and/or cloud services - We have years of collective expertise providing a competitive service to our customers. We can offer a quick and professional solution to your IT issues.

Cabling is a standard way of managing and utilizing your enterprise building's connectivity to facilitate moves, adds and changes on your network without causing unnecessary downtime or interruptions. It's also a smart, easy-to-manage network infrastructure that supports applications such as Internet, TV, Telephone and much more.

STRUCTURED CABLING

SYNCBYTE recognizes that the backbone of any physical technology infrastructure includes the components that comprise the network topology. Whether wireless or wired, network components eventually require a physical CAT or FIBER infrastructure backbone for connectivity. We help you design and install a communications framework that provides maximum efficiency and flexibility.

## NEVER COMPROMISE WITH YOUR BUILDING'S CONNECTIVITY

SMATV / IP TV

SMATV is a system for signals received via satellite, terrestrial networks or radio. Multiple satellite signals are connected to Multi switch. These switches distribute signal to end user. End user can use appropriate satellite receiver/decoder to receive the channels. SMATV networks are used in Residential building, Hotel apartments, small housing estates, hotels, hospitals & corporate sectors.

IPTV provides an integrated platform for simultaneously delivering multiple TV channels over IP protocol to the desktop and television environment. IPTV (Internet Protocol Television) is becoming more popular in modern Hotels and commercial properties. A single head-end can deliver multiple TV channels and be combined with multiple receiver types to meet a customer's exact channel line-up. The VoD platform allows different content formats and their associated data to be managed through a single, integrated interface.
